
PROFESSIONAL SUMMARY

Experienced IT leader with more than 10 years of success in delivering ERP, supply chain, manufacturing, warehouse, and enterprise application solutions across APAC and global business environments. Strong track record in leading end-to-end project delivery, application management, SAP and supply chain solution deployment, business process improvement, system integration, data migration, testing, cutover, and post-go-live support.

Skilled in managing cross-functional teams, business stakeholders, vendors, and regional/global partners to deliver complex transformation initiatives. Brings deep experience in SAP ERP, SAP APO, supply planning, logistics, master data, application portfolio management, and service improvement.

CORE COMPETENCIES

- IT Application Management
- Project & Program Management
- ERP / SAP Delivery
- Supply Chain Systems
- Manufacturing Systems
- SAP APO Planning / SAP MM
- Business Process Improvement
- Stakeholder Management
- Vendor Management
- Data Migration & Master Data Governance
- Testing, Cutover & Go-Live
- Change, Risk & Issue Management
- IT Service Management
- Agile / Lean / SDLC
- Application Portfolio Rationalization
- Reporting & Analytics

PROFESSIONAL EXPERIENCE

3M

Project Lead / IT Lead

Jun 2011 – Present

Lead enterprise application and supply chain solution delivery from discovery through project closure across APAC and global operations. Manage projects, stakeholders, vendors, testing, deployment, and support for logistics, procurement, planning, manufacturing, warehouse, and EDI-integrated processes.

Key Responsibilities

- Lead end-to-end delivery of ERP and supply chain initiatives covering planning, logistics, procurement, manufacturing, warehouse, and order fulfillment processes.
- Manage project sponsors, working teams, business stakeholders, IT teams, vendors, and global/regional partners.
- Translate business requirements into scalable **SAP** and supply chain solutions, including SAP APO Planning and SAP MM.
- Drive master data migration, governance, data readiness, and process alignment for regional and global initiatives.
- Lead functional design, test planning, defect resolution, user training, cutover, go-live, and hypercare support.
- Coordinate with global SMEs, solution leads, data teams, and business planners on integration, process design, and data mapping.
- Manage operational enhancements, issue resolution, release planning, and continuous improvement activities.

Selected Achievements

- Supported SAP deployment for multiple APAC subsidiaries and major supply chain transformation initiatives.
- Contributed to the **Asia Center of Excellent (ACOE)** initiative, helping deliver more than **US\$400M annual business value** through supply chain improvements.
- Supported the **Asia NWI Control and Management** initiative that reduced **US\$17M NWI in one year**.

- Led and coordinated multiple 3PL, warehouse, and distribution center migration initiatives across Singapore, Thailand, and Australia.
- Successfully supported go-live and stabilization for:
 - SAP deployments across APAC countries
 - SAP S/4 cutover activities
 - 3PL integration
- Coordinated **APS / Kinaxis-related data mapping and readiness activities** with China IT, Snowflake teams, SMEs, and global solution teams.
- Supported planning and governance for **AI solution** including effort estimation, approval workflow, pilot planning, and business alignment.
- Drove operational enhancements and issue resolution across:
 - external warehouse setup
 - master data reporting improvements
- Supported **application portfolio management and rationalization**, including Portfolio Management Tool (PMT) updates, ownership review, expiring technology tracking, and application harvest planning.
- Worked closely with various technical, planners, and business teams to ensure successful deployment and operational readiness.

CEH Group

Group IT Manager Feb 2010 – Jun 2011

Headed the IT department and reported to the Executive Vice President to define IT strategy and deliver innovative, quality, cost-effective, and timely IT solutions.

Key Achievements

- Established IT strategy aligned with business growth and operational priorities.
 - Enhanced ERP capabilities across Asia Pacific to improve productivity and support expansion.
 - Led project planning, execution, change management, and risk mitigation.
 - Revamped application portfolio, infrastructure, and security landscape.
 - Reduced support issues by **30%** through structured support processes and root cause analysis.
 - Improved governance, service quality, and support effectiveness across the IT function.
-

CMA CGM Asia Pacific Limited / NOL

System Analyst

Apr 2007 – Feb 2010

Led rollout of supply chain, warehousing, and transportation systems across Asia Pacific using full SDLC methodology.

Key Achievements

- Managed project planning, budgeting, requirements gathering, analysis, design, development, testing, implementation, support, and documentation.
 - Gathered business requirements and presented weekly project updates to the project steering committee.
 - Established 24x7 helpdesk support in Singapore for APAC, Middle East, and Greater China users.
 - Ensured support calls were logged, tracked, and resolved according to SLA commitments.
 - Successfully implemented supply chain solutions for:
 - P&G – Indonesia
 - Del Monte – Philippines
 - Bissell – Hong Kong
-

Solectron / Flex

System Analyst

Jun 2006 – Apr 2007

Implemented and supported supply chain solutions including ERP, WMS, forecasting, and planning systems.

Key Achievements

- Led project implementation and support activities.
 - Worked with QA and business teams to review and complete test cases based on SRS.
 - Delivered SIT, UAT, performance testing, and user training on schedule.
 - Coordinated effectively with application teams, infrastructure teams, and customers.
-

Panasonic

System Analyst

Dec 2004 – Jun 2006

- Implemented supply chain solutions.
 - Monitored project milestones to ensure delivery according to customer timelines and agreed schedules.
-

Chee Eng Hang

IT Analyst / Application Team Lead

Dec 1999 – Dec 2004

- Led implementation and support of enterprise applications, databases, and reporting solutions across Asia.
-

EDUCATION

Bachelor of Science (First Class Honours) in Computer Science

University Technology Malaysia

CERTIFICATIONS

- PMP Certified, since 2010
 - ITIL Certified, since 2010
-

TECHNICAL SKILLS

ERP / Enterprise Applications:

SAP ERP, SAP APO, SAP MM, Kinaxis, Finance, Warehouse Management, Manufacturing, Production Planning, Sales, Procurement, Service, Project Management

Data / Integration / Migration:

SAP BODS, DMR, EDI, SAP BW, Process Chain, Snowflake, Data Mapping, Master Data Governance

Testing / Change / Release Tools:

qTest, HP ALM, ChaRM, ActiveControl, Solution Manager, Worksoft

Project / Delivery Tools:

Jira, Lean-Agile SAP implementation methodology, Scrum

Reporting / Analytics / Other:

Power BI, Alfabet, Microsoft Office, Visual Basic, VBA, SQL

KEY CAREER HIGHLIGHTS

- 10+ years of IT and business applications leadership experience
- Strong experience in ERP, supply chain, manufacturing, and logistics systems
- Proven success in APAC and global stakeholder management
- Led project delivery, cutover, migration, testing, and post-go-live stabilization
- Experienced in both strategic IT management and hands-on solution delivery
- Delivered measurable business value through process improvement and operational optimization
